<https://github.com/Kevalbhavsar27>

Enthusiastic and self-motivated IT professional with strong skills in web development, software design, and problem-solving. Familiar with C programming, PHP, MySQL, and front-end technologies. Passionate about learning new technologies and contributing to innovative projects.

Experience

- full stack devloper @ synthron 25 Mar 2025 - 31 May 2025

Job Description: As a Full Stack Developer at Synthron, I was involved in the end-to-end development of web applications, including front-end user interfaces and back-end server logic. I collaborated with cross-functional teams to deliver efficient, secure, and scalable digital solutions. My responsibilities included requirement analysis, database design, API development, performance optimization, and deployment to production. I worked in an agile environment with weekly sprints and code reviews to ensure high-q

Project: vivahmilan

Technology Used: PHP,MYSQL,HTML,CSS,JAVASCRPIT

Description: This website is designed to help people meet each other, communicate, and take decisions for marriage. The platform allows users to create profiles, search for suitable matches, and interact securely. The system aims to provide a smooth and trusted way for individuals and families to find the right life partner.
